## Verified Alarm Systems

Don't get a  
burglar alarm, get  
**Verified Peace  
of Mind®**

Our monitoring operators use video or sound technology to confirm, or *verify*, what's happening at your business when they receive a security system activation. If there's a threat to your facility, police are called. If it turns out the alarm went off accidentally, the operator can see (with video verification technology) or hear (with sound verification technology) this and reset your security system.

Verifying burglar alarms saves scarce police resources by significantly reducing time wasted spent responding to false alarms. Verified security systems also save you the time, money, and unnecessary stress that's created when you're called in the middle of the night to deal with an alarm going off at your facility.

Verification of burglar alarms is a special skill and our team receives extensive training and experience to be able to do it. We've done it for more than 30 years.

We'd love for to you see our monitoring operators in action. Call and schedule a tour of our state-of-the-art Verification Center™ in Everett. Or, if you can't go to Everett, schedule a virtual tour.

Our team is here for you 24 hours a day, seven days a week, 365 days a year.

Secure Pacific's Verisafe® security is an affordable option for verified alarm systems and video surveillance. We offer better technology monitored by verification experts.

You're busy running a business, you don't have time to waste on burglar alarms that are false 98% of the time. Secure Pacific has the solution: *verification*.

When your security system activates, our experts can confirm, or *verify*, the threat is real. We won't call you or the police for what turns out to be a balloon floating around in front of a motion sensor. The result is complete security and true value for your investment.

We don't guess. We verify.

## False Alarm Fines Skyrocket

When you choose a verified security system, you'll have no unexpected expenses from false alarm fines. The false alarm fee schedule listed below from a Pacific Northwest city is a common one.

- **First False Alarm - No charge**
- **Second False Alarm - \$50 fee**
- **Third False Alarm - \$100 fee**
- **Fourth False Alarm - \$150 fee**
- **Five+ False Alarms - Suspension of services may occur.**

Failure to pay false alarm fees could result in suspension of police service.

## Verified Security - Real Security

Secure Pacific is proud to offer Verisafe® verified security solutions. False alarm ordinances and fines aside, we believe it is simply a better way to protect your home or business. From our customized alarm systems to our integrated security solutions, we have the people, processes and technology to make sure it is done right. Operating our own Verification Center™ makes this all possible. Secure Pacific is small enough to care, but big enough to deliver.

### Verified Alarm Systems for Small Businesses

Our Verisafe® verified alarm systems deliver complete security and complete value. We have a wide array of solutions for even the most cost-conscious of companies. We also understand the needs of a local business since we are a local business ourselves.

Verisafe® security offers a fully wireless system with a major advantage over average burglar alarms. When your security system detects something, our technology can capture an image and send it to our Verification Center™. This allows our operators to verify a crime in progress and dispatch police with a higher priority.

**Security without limits. No power? No problem. No phone line? No worries. We have solutions for even the most challenging situations.**

### Video and Sound Verification

The best security solution combines video and sound verification technology. We offer IP Security Cameras and Sound Monitoring sensors that begin transmitting once activated by a motion detector or other sensor. This winning combination transmits sound as well as video back to our Verification Center™ for assessment. Our expert operators know exactly where to look and what to listen for. With the alarm verified, we quickly dispatch the police with urgency. We have found police response time is substantially decreased with hard proof in hand. The best way to fight crime is to arrest the criminal at the scene and preferably before the theft and vandalism occurs.

### Peace of Mind Guarantee

Secure Pacific's Peace of Mind Guarantee sets us apart. You will sleep easier knowing you are not only safe but your equipment is covered. Our program offers the following components:

- 6 Month Satisfaction Guarantee
- Full Warranty on Equipment and Labor
